# DNAS ARCHITECTURE

## Client Side Setup

On the client side, install the EDCAST Version 3.0 or later software. Also you can install the Win Amp Media player as with EDCAT Version 3.0 Win Amp Plugin.

### Download Pages

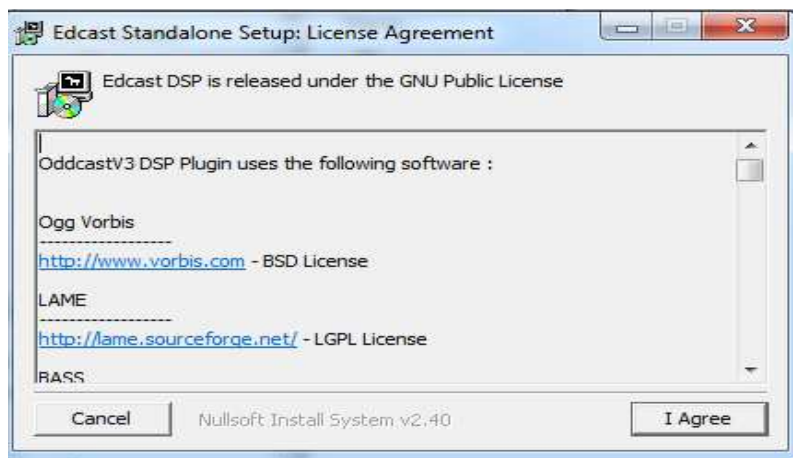

Edcast Version 3 - <http://www.mpex.net/software/download/edcast.html> (Will auto download)

Win Amp - [http://www.filehippo.com/download\\_winamp](http://www.filehippo.com/download_winamp) (Click Download Link)

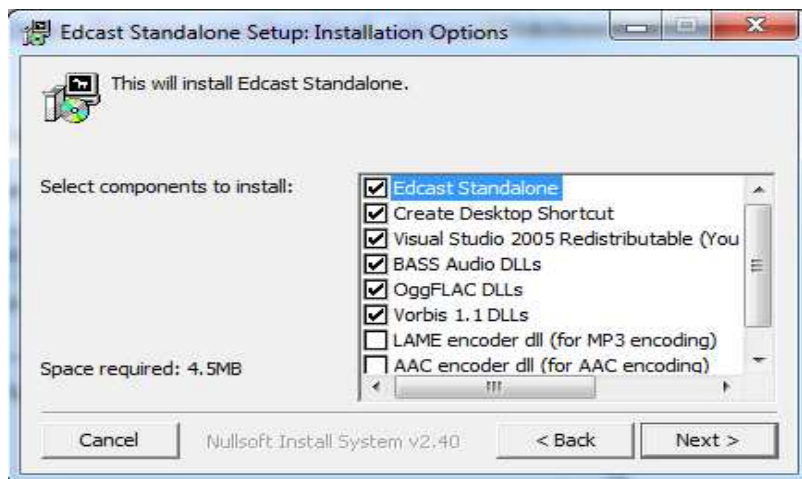

### Edcast V3 - Installation

Broadcast the audio sound from the PC/Laptop to IceCast 2.0 server for the public.

- a. Install the Edcast Standalone first, second Plugin

Click I Agree

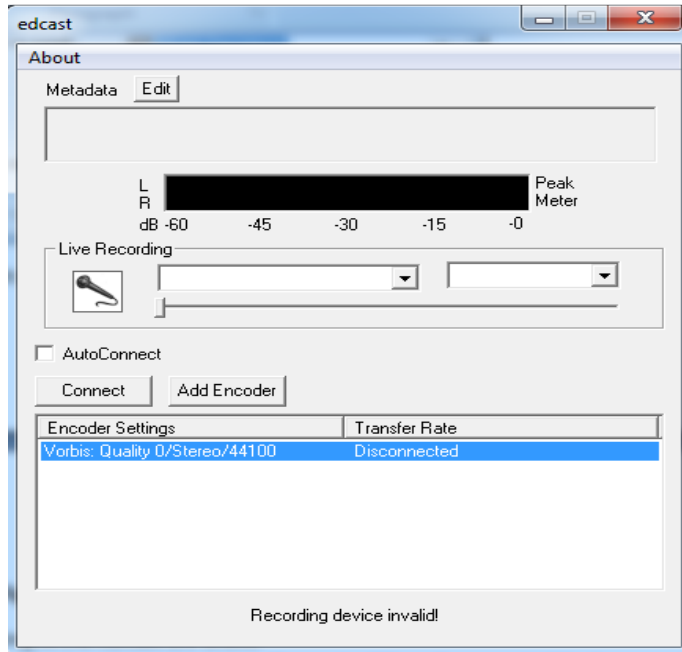

Leave the default selected and click Next> done.

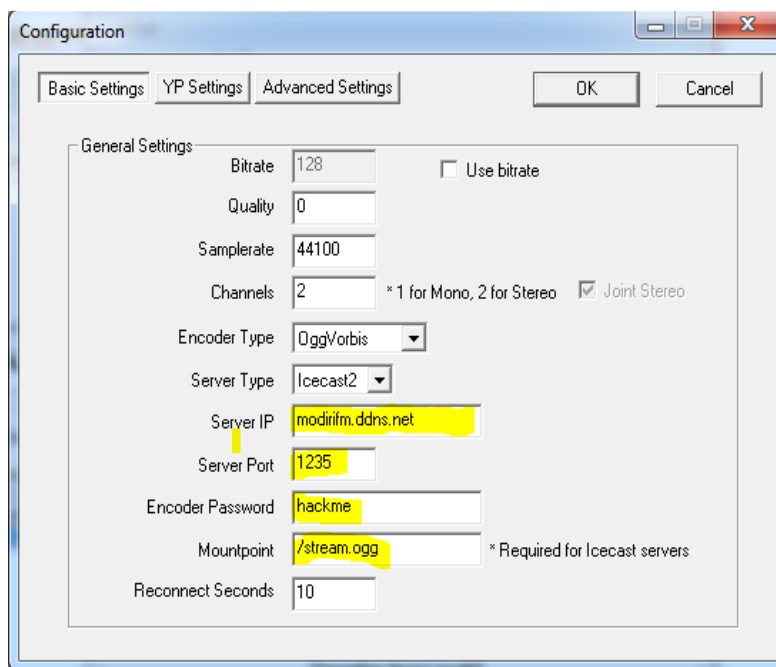

## Edcast V3 – Configuration

- ✓ Connecting to the IceCast 2.0 DNAS
- ✓ Connecting with audio source either Computer Microphone or via Win Amp music playing

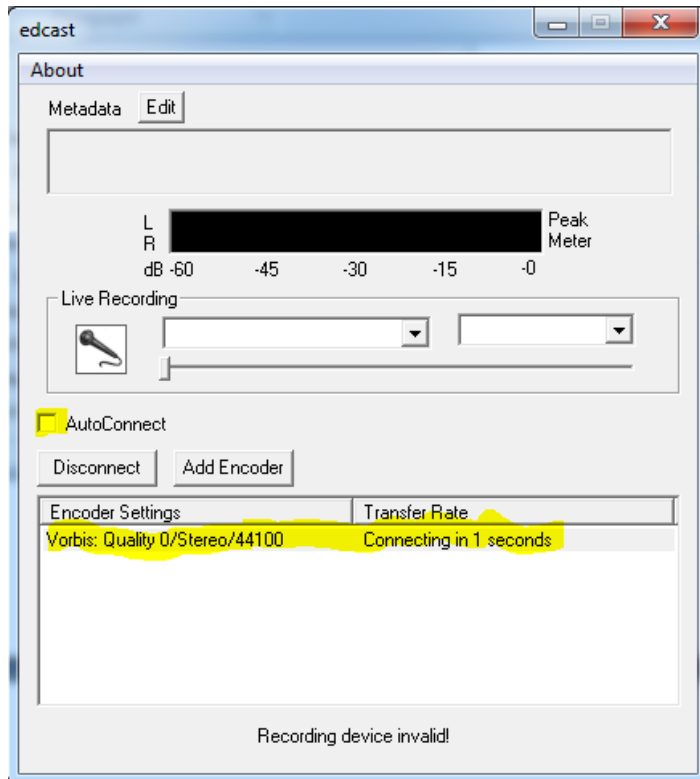

## Lanch EdCast V3

Click Add Encoder or Double existing one as highlighted below. Live recording select the Microphone to use. The hightled must be typed as shown the click **ok**

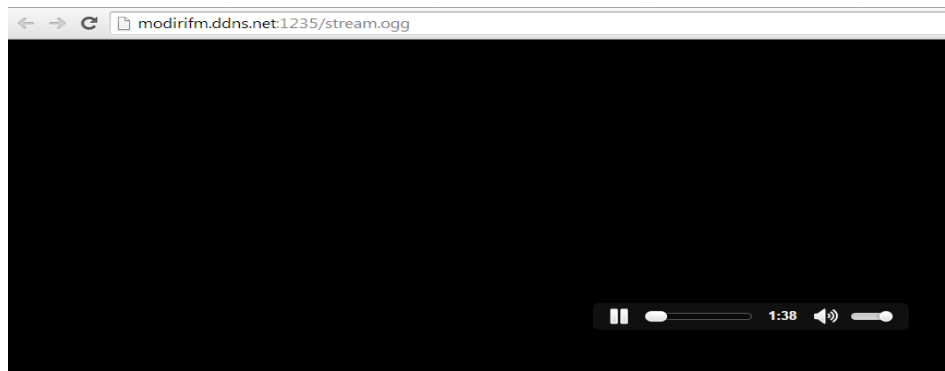

When done with the inputting above values. Please click **connects**, to connect to the IceCast 2.0 DNAS.

The server will be connected with transfer rate indicating data sent per seconds. You can click Auto Connect for automatic connection to the server.

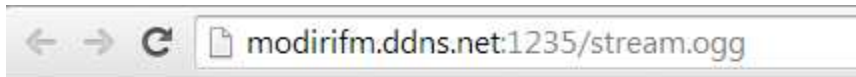

When connected and music playing or audio sound playing you want broadcast.

## Results

If you see the screen above click play to play the sound and here you will know that it's working 😊

If you the error below means that there is no sound coming out.

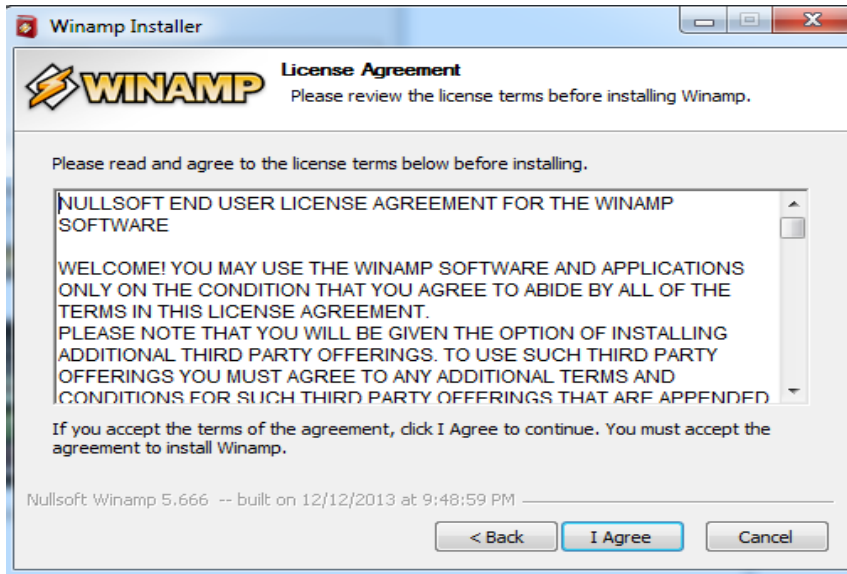

**The file you requested could not be found**

**N.B:** if not working contact [www.vosgphere.co.za](http://www.vosgphere.co.za).

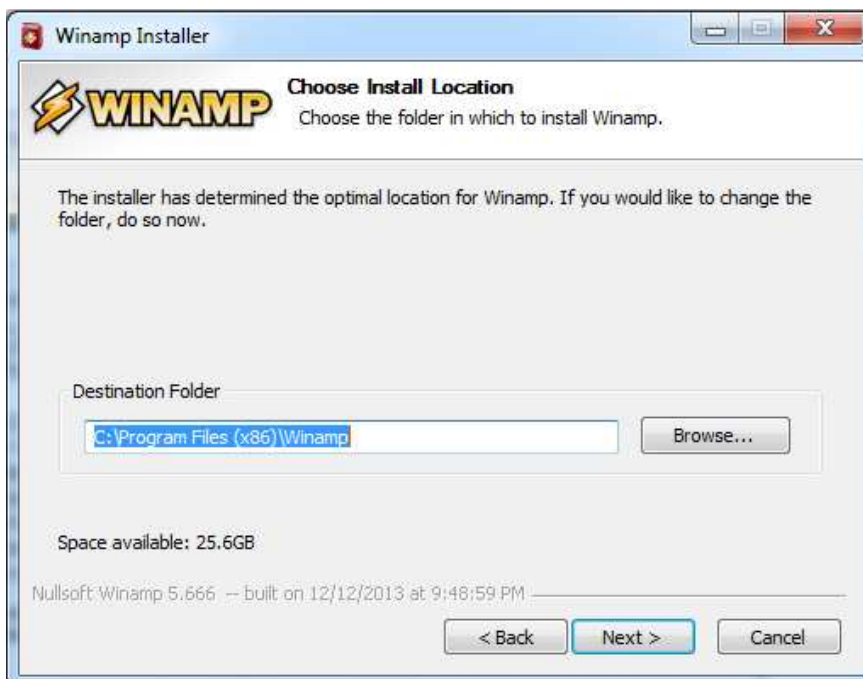

### **Win Amp – Installation (Optional)**

Win Amp is a music playing software. This allows it to use the Edcast V3 to broadcast the played music to IceCast server 2.0 for public broadcast.

Click I Agree

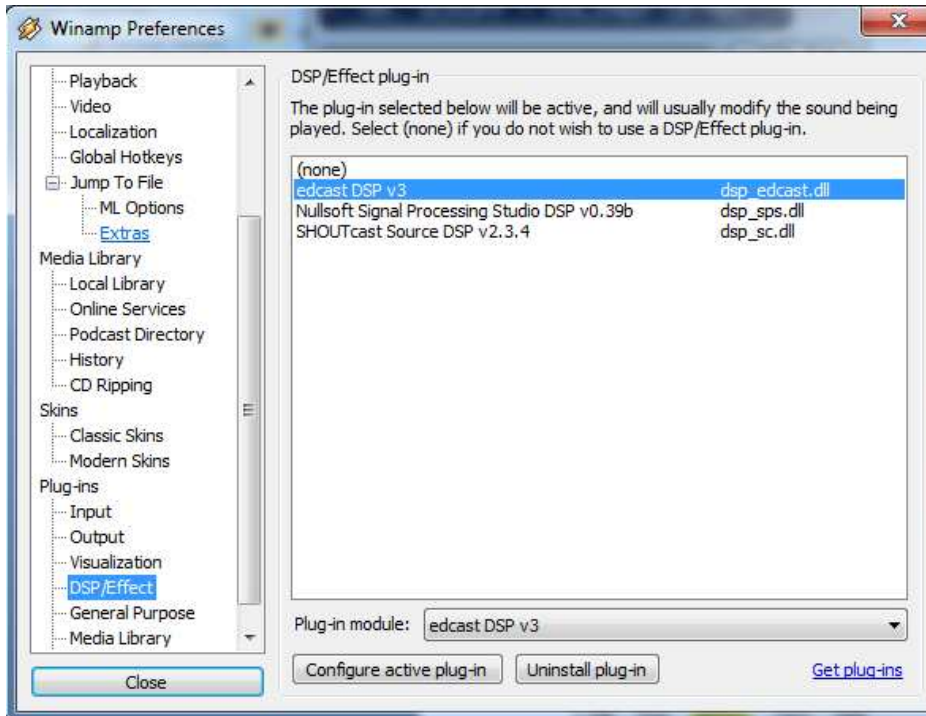

Click **Next>** and done with the installations

### Win Amp Configurations

- ✓ Connecting to the IceCast 2.0 DNAS
- ✓ Connecting with audio source either via Win Amp music playing

Lanch Win Amp, Click Options->Preference

Select DSP/Effect, select Edcast DSP V then click configure active plug-in.

Same screen and configurations as done on **Edcast V3 – Configuration** section.

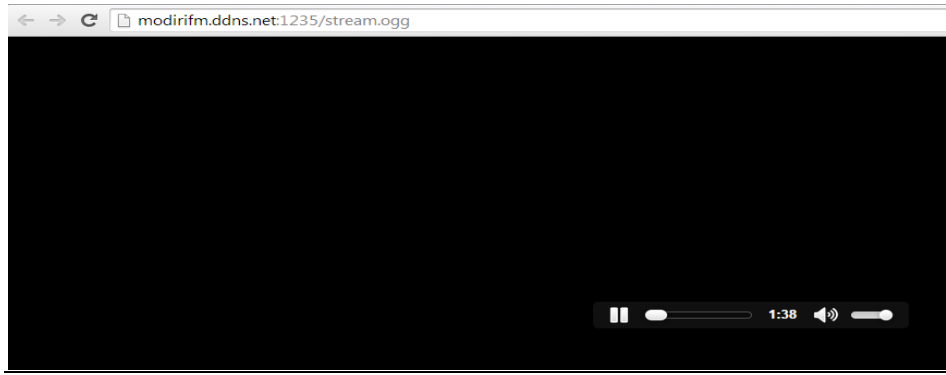

## Testing the Streaming

On the browser type this on a different device not the one you connecting. This works with recent Smartphone, laptops and other device connected to the different network with your client.
